

As a resident of the Des Moines area, I am served by K-LOVE radio on 90.5FM. This station provides our area with positive, commercial-free programming that could be affected by the new broadcast service Low Power FM (LPFM). With the limited "family-friendly" programming on radio today, K-LOVE serves the residents of our local community with encouraging music and wholesome values that "deserve to be preserved". I believe that there would be a negative effect if this station were displaced by an LPFM broadcaster that does not provide similar positive broadcasting.

Thank you for the opportunity to respond to this issue.
